UNIQUE

THE WAY TO A BETTER WORLD.
BERGO INTRODUCES ECO UNIQUE.

NEW! 100%
RECYCLED
COMPOSITE

ECO UNIQUE is made of 100% recycled material.

“When buying one of our ECO products, you take part in our environmental vision and help us to reduce the mountains of waste around the world. We simply call it - The way to a better world.”

Bergo takes another step with their ECO products by introducing the beautiful BERGO ECO UNIQUE; a floor made of 100% recycled PP-composite and in six attractive colours.

After years of research Bergo Flooring has together with exclusive suppliers managed to develop a recycled material that reaches the same high quality level as for their normal range of composite floors. The new material does not compromise whatsoever on the unique multifunctional properties that Bergo floors offer.

All products within the ECO-series are made from 100% recycled material and can be recycled again and again. No need of glue or special tools to lay a Bergo floor. It can be installed in any imaginable type of environment and climate, and functions equally well indoors as out. The use of Bergo floor tiles solves many problems, such as installations on damp surfaces, cracked/uneven subfloors and worn-out wooden decks.

Usage areas

BERGO UNIQUE is specially developed for usage areas such as: Balconies and patios, garages, storage rooms, basements, bathrooms, saunas, pool areas, showers and laundry rooms and other residential applications.

Easy to install

Tapping a rubber mallet or similar over the protruding rings easily interlocks the tiles together. No special tools, glue or screws are required. Use a jigsaw to cut the tiles for a perfect fit.

Minimal maintenance

Bergo tiles require virtually no maintenance. Normal floor care such as occasional wiping with a damp cloth, vacuuming and/or hosing is usually all that is needed. BERGO UNIQUE can stay outside in both summer and winter. Your floor will be in good condition year after year.

Accessories

- Edge strip – 376 x 55 mm, for a smart and safe finish.
- Corner strip – 55 x 55 mm.
- Cable strip – 376 x 55 mm, for hiding cables underneath the floor. In most cases one row of Cable strips should be allowed for every 8th row of Bergo floor System 2. To many rows with Cable strips on a surface can prevent the floor from expand, especially in environments where the floor can be exposed to varying temperatures.
- Cable cross-piece – 55 x 55 mm, to be used as two lines of the above Cable strips intersect with each other.
- Disassembly-tool – for easy disassembly and rearrangement.

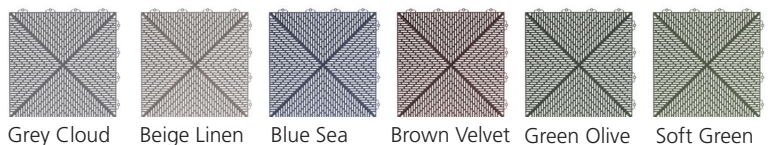

Technical information

Material: Recycled environmentally-friendly UV-stabilised PP-composite.

Size of tile: 380 x 380 mm.

Thickness of tile: 10,2 mm.

Packaging: 1 m² / package = 7 tiles.
5 m² / carton = 35 tiles.
